

Space Center Camps

When looking for a great activity for students ages 10-16 to participate in this summer, check out the Christa McAuliffe Space Education Center. Students take on the role of crew members in a starship simulator set 300 years in the future. During their mission crews will test their skills in communication, critical thinking, collaboration, and will have to creatively problem solve to overcome many challenging situations. Camp options vary in length and prices, ranging from \$40-\$150 with all camps include at least one meal.

Visit spacecenter.alpineschools.org/camps for more details.
